School Guiding Principles

Our Shared Vision

Together we are a learning community that celebrates and advances excellence in care of each other (student and teaching community as a whole) and ourselves through shared responsabilty, collaborative innovation, mutual understnding and the courage to act in a meritocratic, transperant and supportive environment.

This vision is achieved through:

Our Philosophy: Principles Oriented

AK Malta offers unparalleled student experiences across a broad spectrum of academic environments. Our mission is based on the integration of both technical and conceptual learning with the aim of delivering a holistic and competence-weighted learning experience for each and every student.

Our Method: Student-Centric and Competence-Based

We not only take personalized learning seriously; we approach it with a bias.

A competence-based learning is different than a standard-based educational system in ways that it prioritizes skill acquisition over the standard test-scores. Most of our courses are based on a **project-based** approach, encouraging students to intuitively learn to apply theory and instructional information to practical and real-life-scenario projects both individually or in group dynamics.

It is our core mission to provide a personal learning experience and approach to each and every student.

Led by Professional Artists and Designers

As one of our principle founding missions, we are led by many of the industry leading artists and designers of the day. We believe that to achieve an Excellent student-learning environment **inspiration**, **ambition** and a **growth mindset** to be among the main catalysing factors of our educational attitude and experience.

In turn, each of AK Malta's leading instructors is a professional and practicing artist or designer elected by their peers in recognition of their work.

This includes honesty about performance, unknowns, feelings, intentions, perceptions, critique and preferred outcomes. We acknowlege that in order to constantly improve and overcome such challenges - at both organisational and individual level - we must communicate these issues when they arise through meaningful and open dialogue.

iv. Loyalty

We are committed to our relationships. We will value each other's interests as we value our own. We will strive towards cumulative benefit and not be absorbed by ego-centric personal gain at the expense of others'. Standing together through adversity, we will achieve our Shared Vision.
